

What is the hATTR Compass Genetic Testing Program?

Akcea Therapeutics and Ambry Genetics are partnering to offer no-cost, confidential genetic testing and confidential genetic counseling to patients through the hATTR Compass Program who are clinically suspected of having hereditary ATTR amyloidosis with polyneuropathy as well as individuals with a family history of hereditary ATTR amyloidosis.

Why early family screening?

If there is a suspected family history of hereditary ATTR amyloidosis, it's imperative to seek early family screening through genetic testing and speed the rate of diagnosis.

For family members, genetic testing for hereditary ATTR amyloidosis is the first step on the diagnostic pathway to understand your future risk for this condition. For patients with symptoms of hereditary ATTR with polyneuropathy, genetic testing can be the final step on your diagnostic journey. It allows patients to recognize the polyneuropathy symptoms sooner so that you can make a healthcare management plan and treat the condition before it potentially gets worse.

"I decided recently, with new information coming out about hereditary ATTR amyloidosis giving me more hope, that it was my time to get tested."

- Angel, Patient Advocate for hATTR Compass

Why genetic testing through hATTR Compass?

Simple. Genetic testing can be completed through a saliva or blood sample. Once you submit a sample for DNA analysis, your patient's results will be sent to you within 2-4 weeks.

Accurate. Ambry Genetics is the recognized industry leader in quality genetic testing and has built in quality control measures that ensure accurate test results.

Support. Enrolled patients have the option of a total of two sessions of no-cost, pre- and/or post-test genetic counseling.

Who is eligible?

The hATTR Compass Program is available for patients who are 18 years and older who have symptoms consistent with hereditary ATTR amyloidosis with polyneuropathy as well as individuals who have a family history of hereditary ATTR amyloidosis. The program is available in the United States, Canada and Puerto Rico. While Akcea provides financial support for this program, all tests and services are confidential and performed by independent third parties.

What should your patients know about hATTR Compass?

There are many factors for patients to consider when deciding whether to get genetic testing. However, early genetic testing can help patients make informed decisions about future monitoring and treatment, ultimately helping them manage their potential disease.

You and your patients are not alone when it comes to genetic testing through hATTR Compass. Ambrity Genetics' field team of specialists are available to conduct office visits and answer any questions you might have. Ambrity is also available to answer any questions patients might have about the process at +1 (949) 900-5500.
